From: Central Statistics Office

Subject: financial and technical support for the CSO Internet Server

Dear Sir,

It should be mention that CSO is one of the main data providers in Afghanistan as main data provider it needs to have its own Website to present itself and the results of its work. Currently the CSO site www.cso.gov.af is out of service because of outstanding fees that have to be paid to the Internet Service Provider (ISP) NETLINKS who is hosting the site.

NSS project is already deeply involved in the development of several CSO Internet presentations (CSO site, CPI, NRVA) Now CSO is requesting project to take over the responsibility for setting up a dedicated Internet Server for CSO for a distinguished period of time (i.e. one year) in order to make the CSO Internet presentations available as soon as possible.

CSO is very thankful and grateful to your continuous partnership and cooperation.

Yours sincerely,

**Abdul Rashid Fakhri
General President of CSO**
